Certified Specialist for Implantology,
Specialization in implantology and implant
prosthetics (DGI, NVOI), Specialization in
implantology (DGI, NVOI), Specialist for implant
prosthetics and dentistry (DGI)

The Clinic

The training facilities are integrated within their state-of-the-art private clinic on the 4th floor of a historic building at Weinstrasse 4. The dental practice is located in the heart of Munich at „Marienplatz“, only a few steps away from one of the leading shopping avenues of Europe – the Maximilianstrasse – home of the leading luxury brands of the world.

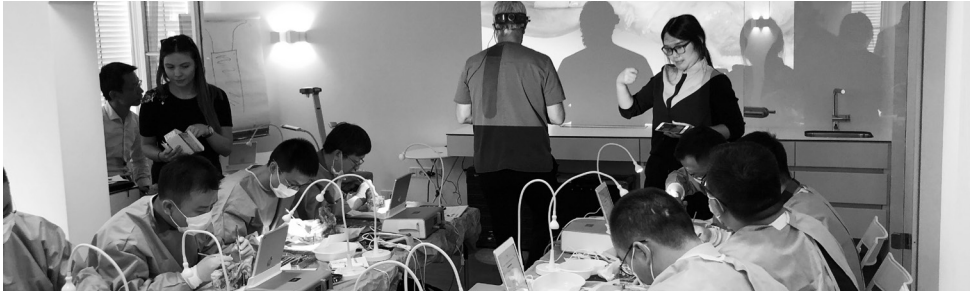

Introduction

The course is flexible enough that it can provide a robust learning experience for clinicians who have an advanced clinical experience level.

Hands-on and the live surgery procedures are held at the Implant Competence Centrum Cacaci & Randelzhofer.

This course is given over a two-day period. Topics include advanced techniques on esthetic restorative procedures, suturing techniques and emergence profile development. Participants will receive theoretical, hands-on and live surgical training. Hands-on procedures on pig-ears provide an opportunity to refine suture techniques, grafting procedures and harvesting techniques for soft tissue grafts.

During the live-surgery portion of the course, topics covered include roll flaps, how an emergence profile is developed as well as implant surgery with GBR in the esthetic zone.

Course description

Category	International course, Hands-on, Live-Surgery
Speakers	Dr. Cacaci & Dr. Ranzelzhofer
Date	ON DEMAND
City	Munich/Germany
Target group	Implantologists
Level	Advanced
Language	English
Participants	Min. 8, max. 12

Overview course content

This course offers participants an in-depth training on esthetic and prosthetic driven implantology, given by our experts Dr. Cacaci and Dr. Ranzelzhofer.

Learning objectives

- Know how to determine the ideal 3-dimensional positioning of the implant in the esthetic zone.
- Learn to apply proven techniques for transplanting soft tissue in the anterior region.
- To know which suturing technique to use for esthetically challenging applications.
- Learn how to achieve a natural emergence profile with a temporary immediate crown.
- To learn the skilled and esthetically optimized use of roll flaps in the second stage surgery.

Requirements

- Advanced knowledge of implantology
- Focus on the esthetic zone

Certificate

You will receive a certificate for 12 hours continuing education.
